PETER MCCULLOUGH AND CRAIG PARRY SAVE A LIFE NEAR EDSON

It was 2am when they saw it.

Peter saw a tractor trailer unit flip over onto its side about a kilometer down the road from where they were stopped. Peter grabbed the first aid kit while Craig started running. When he was about halfway there Craig noticed that the truck was on fire.

When he arrived at the scene Craig started yelling in all directions to see if the driver had made it out OK. The Kenworth was laying on the passenger side door; half on the highway and half in the ditch. Craig ran into the ditch to the roof of the truck, he then climbed up onto the driver's side door to see if the driver was around. While repositioning himself he slid off the truck, by this time the flames were spewing out of the top of the hood and it was not possible to see through the windshield. Craig climbed back onto the driver's door and the driver was now standing and staring up at him looking very disoriented.

Incredible Rescue

Craig thought about kicking in the window but the driver would not look away so he yelled at the driver to try the door which looked undamaged and it opened. Craig pulled the door up and held it with his leg, he then pulled the driver out and lowered him to the ground. Craig and Peter assisted him away from the truck and by the time

they were about 50m away the whole cab was engulfed in flames. The RCMP and Ambulance arrived after about ten minutes and our guys handed the scene over to them. Their good deed for the day done Craig and Peter went back to work.
